Operating Costs Calculation Sheet

Unit 3 - Business Project

Name of Business: _____

Proprietors: _____

_____

Directions: Complete the following in a THOROUGH and DETAILED manner. Use additional sheets as needed.

1) Startup Costs

List the startup costs involved with your business. What land, labor, and capital do you need to open your doors? Research an accurate cost for each. Refer to classified ads, real estate listings, stores selling resources you need, the Internet, etc. to find accurate costs.

ITEM	COST

TOTAL STARTUP COSTS:

_____

2) Ongoing Costs

List the ongoing costs will you experience once your business is up and running (labor, inventory, marketing, etc.) Calculate the costs on a monthly basis. Don't forget your own salaries!

ITEM	COST

Costs, Prices, and Revenue

Directions: In the table below, list your marginal cost for making each good or service you provide, the price you will sell the product for, and the marginal revenue for each sale. Include upgrades customers can choose for goods/services, if applicable.

Good/Service	Marginal Cost	Price it Sells For	Marginal Revenue
